Message

from the President of the Indian Psychiatric Society

Dear Esteemed Colleagues,

As we gather for the **39th Annual Conference of the Indian Psychiatric Society Rajasthan Chapter (RAJPSYCON 2024)** on the **14th and 15th of September 2024**, I extend a warm welcome to each one of you. This year's conference theme, "**AI and Legal Jargon: Road Map Ahead for Psychiatric Practice**," reflects the evolving landscape of our field and the critical intersection of technology and law in psychiatric practice.

Artificial Intelligence (AI) has emerged as a transformative force across various disciplines, including psychiatry. From diagnostic algorithms to personalized treatment plans, AI holds the promise of enhancing the accuracy, efficiency, and accessibility of mental health care. As we delve into the potential of AI, it is imperative to understand its applications, benefits, and limitations within the realm of psychiatry.

However, the integration of AI into psychiatric practice brings forth a host of legal and ethical considerations. Issues related to patient confidentiality, data security, informed consent, and the liability of AI-driven decisions are paramount. Navigating these complexities requires a thorough understanding of legal jargon and regulatory frameworks. Our discussions at this conference will aim to equip practitioners with the knowledge and tools to ethically and legally incorporate AI into their practice.

The road map ahead for psychiatric practice in India necessitates a collaborative approach. By fostering interdisciplinary dialogue between psychiatrists, legal experts, and technologists, we can ensure that AI is harnessed responsibly and to the maximum benefit of our patients. I encourage each participant to actively engage in the sessions, share insights, and explore innovative solutions to the challenges we face.

I am confident that **RAJPSYCON 2024** will be a platform for meaningful exchanges and a catalyst for advancements in our field. Together, let us pave the way for a future where technology and psychiatry work hand in hand to improve mental health outcomes.

I specially congratulate Dr. Manaswi Gautam and his team for organizing this conference and I am confident that it will be a grand success. My best wishes for the conference.

Warm regards,

Dr. Laxmikant Rathi
